

USBAH SALEEM

Flutter Developer · Software Engineer · Cross-Platform Specialist

Passionate **Full-Stack & Flutter developer** with hands-on experience building production-quality cross-platform applications and **AI-driven solutions**. Skilled in scalable state management, REST API architecture, real-time features, and crafting pixel-perfect UIs. Currently in 6th semester of **BS Computer Science** at COMSATS University Islamabad, with a portfolio of 5+ projects spanning social networking, AI, e-commerce, and productivity — eager to contribute to a high-impact engineering team.

Portfolio

usbah-portfolio.vercel.app

LinkedIn

linkedin.com/in/usbah-saleem-315a0b327

CGPA

3.4 / 4.0

TECHNICAL SKILLS

Languages

Dart, Python, JavaScript, Java, C++, HTML/CSS, SQL

Frontend

Flutter (Web/Mobile), Material 3, HTML5/CSS3, Custom Widgets

Backend

Node.js, Flask, Supabase, Firebase, RESTful APIs, JWT

State Management

Provider, Riverpod, Bloc/Cubit, GetX

UI / UX

Animations, Lottie, Figma hand-off, Prototyping

Real-time

Supabase Realtime, Firebase RTDB, WebSockets, Agora SDK

Databases

SQLite, Hive, SharedPreferences, Supabase (PostgreSQL), Firebase Firestore

Maps & Location

Google Maps API, PostGIS, Geolocator, Flutter Map

Auth & Security

JWT, OAuth2, Supabase Auth, Firebase Auth, biometric login

AI / ML

TFLite, OpenCV, PyTorch, MTCNN, Flask model serving, on-device inference

Tools

Git, GitHub, VS Code, Android Studio, Postman, Figma

SOFTWARE DEVELOPMENT PROJECTS

NearConnect — Location-Based Social App

Flutter · Supabase · PostGIS · Google Maps API · Agora SDK · WebRTC · Supabase Realtime · Riverpod

- Engineered **PostGIS** geo-queries to surface nearby users within a configurable radius — results update live via **Supabase Realtime**
- Built interest-based matching engine; users see ranked connections filtered by shared tags and proximity score
- Integrated one-on-one and group video calls using **Agora SDK** with **WebRTC** signalling — call quality optimised for low-bandwidth conditions
- Designed scalable **Supabase (PostgreSQL)** schema with **Row-Level Security** so users only ever access their own data
- Delivered smooth map clustering, animated profile cards, and custom chat bubbles with Flutter's animation API

ShopEase — E-Commerce Application

Flutter · Node.js/Express REST API · MongoDB · Stripe SDK · Firebase Push Notifications · Bloc

- Built dynamic product catalogue with category filters, search, and pagination consuming a custom **RESTful API**
- Integrated **Stripe** payment gateway — handled card tokenisation, payment intents, and webhook-driven order confirmation
- Implemented **Firebase Cloud Messaging** for real-time push notifications on order status changes
- Used **Bloc** for predictable state management across cart, wishlist, and checkout flows
- Achieved sub-300 ms API response times through indexed **MongoDB** queries and efficient Flutter widget rebuilds

AttendAI — Facial Recognition Attendance

Flutter (mobile client) · Python · PyTorch · MTCNN · InceptionResnetV1 · Flask API · OpenCV · SQLite

- Built the Flutter camera interface with real-time frame streaming to a **Flask API** endpoint for face recognition
- **MTCNN** detects faces; **InceptionResnetV1** generates 512-d embeddings matched via **cosine similarity** — 97%+ accuracy on test set
- Designed offline-first **SQLite** storage on the mobile side so attendance logs persist without connectivity
- Created a clean dashboard displaying attendance statistics with animated charts (fl_chart) — reduced manual tracking time by ~100%

EventGo — Campus Event Registration App

Flutter · Dart · REST APIs · SharedPreferences · Firebase Auth

- Architected full registration flow with Firebase Auth login, persistent session via SharedPreferences, and QR-code ticket generation
- Integrated dynamic event imagery and live seat-count updates through REST API polling
- Delivered polished onboarding animations, custom bottom-nav, and adaptive layouts for phone and tablet

FocusFlow — Productivity & Habit Tracker

Flutter · Hive (local DB) · Riverpod · Flutter Local Notifications · Lottie Animations

- Implemented **Hive** NoSQL local database for instant read/write without a network dependency
- Built Pomodoro timer with background isolate so the countdown persists when the app is minimised
- Scheduled daily reminder notifications via flutter_local_notifications with custom notification icons
- Integrated Lottie animations for habit completion celebrations — improved user retention through engaging micro-interactions

EXPERIENCE

AI Intern — SPS (Software Solutions)

Jun 2024 – Sept 2024

Software Solutions Company · Islamabad

- Contributed **UI components** and **REST API** integrations to a live client-facing application
- Collaborated in **Agile** sprints — participated in standups, code reviews, and sprint retrospectives
- Researched and prototyped **on-device AI model integration** using TFLite for real-time inference
- Assisted in data preprocessing pipelines and model testing to improve prediction accuracy

President — Creative Dynamic Society (CDS)

2024 – Present

Student Leadership · COMSATS University Islamabad

- Led a **multidisciplinary team of 300+ members** managing planning, budgeting, logistics, and sponsorship for large-scale campus events
- Organized 5+ major events using structured event-management frameworks, growing society membership and campus-wide visibility

EDUCATION

BS Computer Science

2023 – 2027

COMSATS University Islamabad

CGPA: 3.4 / 4.0

Intermediate

2019 – 2021

KIPS Girls College, Multan

1076 / 1100
